

Sheth N.K.T.T. college of Commerce and Sheth J.T.T. college of Arts

Environmental studies 2020-21

Course objectives- The syllabus of Environmental studies aims,

1. To enable students to recognize the physical, chemical, and biological components of the earth's systems and show how they function.
2. To help students to create informed opinions about how to interact with the environment on both a personal and a social level
3. To understand and critically examine all sides of environmental issues and apply understanding
4. To develop a better sense of not only individual organisms, but of the systems in which these organisms live
5. To understand the significance and application of mapping techniques

Course outcome

1. Students acquire the necessary knowledge, skills, attitudes and values so that as a citizen they would take care of the environment with a sense of responsibility towards the present and future generations;
2. Students will be able to understand and interpret the interactions between bio-physical, socio-cultural and economic facets of the environment;
3. Students develop a holistic approach by understanding how local actions could have global repercussions;
4. Students will be able to identify a variety of environmental issues of a local, national, regional, or global nature and their ecological and cultural implications.
