

Certificate Course in Web Designing

Course Content

- Basics of Web Designing
- HTML
- CSS
- JavaScript
- Adobe Dreamweaver

Objective

Web designing is a short-term professional job-oriented course. A series of tasks (website development, website self-assessment), as well as several group activities (discussions, online resource sharing, collaborative work) will help you gain practical experience on web development and a thorough understanding of web design issues.

Outcome

Simple and impressive design techniques, from basics till advanced to focus on goal oriented and user centric designs. How to and where to start research, planning for website & actually build excellent web sites. To create web elements like buttons, banners & Bars and of course complete UI designs. Forms and validations for your website. Setting up page layout, color schemes, contract, typography in the designs. Writing valid and concise code for webpages.

Career opportunities and employability

The demand of web development professionals is increasing and this has created a huge job opportunity for the aspirants in the upcoming days. Also, an experienced person in this field can also work as a freelancer; there are many online companies which provide online projects to the individuals.
