

**Date 11/05/2021**

### **Code of Ethics for Research**

The codes of ethics are related with the field of research work. The faculty members, research supervisors, research scholars and Students undertaking the research / Project work in the college are mandated to follow code of ethics.

It involves all the activities through which research data and other relevant information are collected, analysed, processed and disseminated including surveys and interviews and the reporting of research findings.

- Prior submission/published any Research work, should be verified by Research Cell.
- In research work, references should be clearly mentioned by the researchers to avoid discrepancies.
- It is expected that projected work is not published, copyrighted anywhere else.
- The institution believes that a research has to be original and genuine in order to fit on the parameters of quality and honesty.
- Researchers shall maintain confidential data securely and do not use such data for the personal advantage or for advantage of any other person.
- The faculty and students are expected to avoid casual attitude and negligence with research work.
- Before submission research work, online plagiarism must be checked to use Anti-plagiarism checker software.
- Research Cell recommends free online plagiarism check website link for reference:
