Find Beta and Alpha of A Ltd. Scrip.

7. What are the assumptions of CAPM? Distinguish between CML and SML.

#### SECTION-C

Answer any three of the following questions. Each question carries twelve marks.
(3×12=36)

- 8. Explain in detail Dows theory and how it is applicable to determine the direction of stock market.
- 9. Stocks X and Y display the following return over the past three years.

Year	Retu	rn %
Year	Х	Υ
2012	14	12
2013	16	18
2014	20	15

- a) Determine the expected rate of return on portfolio made up of 40% of X and 60% of Y.
- b) What is the standard deviation of each security?
- c) Determine the portfolio risk of a portfolio made up of 40% of X and 60% of Y.
- 10. For the first four years A Ltd. is assumed to grow at a rate of 10%. After 4 years, the growth rate of dividend is assumed to decline linearly to 6%. After 9 years, the company is assumed to grow at 6% indefinitely. The next year dividend is Rs. 2 and the required return is 14%. Find out the value of the stock.

- 11. Explain the sharpe index model. How does it differ from Mancowitz model.
- 12. A Ltd. and B Ltd. have the following expected risk and return inputs for the following years.

Year	Return %	Variance o <sup>2</sup> %
A Ltd. lyr	15	16
B Ltd. llyr	18	25

Portfolio risk (standard deviation) for a portfolio of 50% in each asset is 4.03. Determine the correlation coefficient that will be necessary to reduce the level of portfolio risk by 75%.

What is the expected return of the equally weighted portfolio [50% of A Ltd. and 50% of B Ltd.?

# II Semester M.F.A. Degree Examination, July 2012 (Semester Scheme) FINANCE AND ACCOUNTING

### Paper - 2.4 : Securities Analysis and Portfolio Management

Time: 3 Hours

Max. Marks: 80

#### SECTION - A

Answer any ten of the following questions in about 3-4 lines. Each question carries 2 marks. (10×2=20)

- 1. a) What is Red Herring Prospectus?
  - b) What are business and financial risks?
  - c) What is minimum risk portfolio?
  - d) What is correlation coefficient?
    - e) What is money market?
  - f) What are zero coupon bonds?
  - g) XYZ Ltd. would pay Rs.4 as dividend per share next year. The dividend is expected to grow perpetually at 12%. What would be the value of equity shares if the investors expected return is 20%?
  - h) What is characteristic regression line?
  - i) What is P/E ratio?
  - j) What is immunisation of bonds?
  - k) Define efficient frontiers.
  - I) What are the stock market indices? List out the major indices.

### Stos viut notanim SECTION-B A 2 M reteemed II

Answer any three questions in about a page each. Each question carries five marks. (3x5=15)

2. From the following particulars find out the over valued and under valued securities as per CAPM.

Security	<b>Expected Return</b>	Beta	Standard deviation
Α	0.33	1.70	0.50
Barries noiteeur	in about 1.0 lines. Each o	1.40	oniwollol ed 0.35
С	0.26	1.10 Sautoena	0.40
D	0.12	0.95	0.24
E	0.21	1.05	0.28
T-Bills	0.09	0	O Space acidalaman at today.
Nifty Index	0.13	1.00	0.28

- 3. Changes that occur in the interest rate and purchasing power affects bond's return, discuss.
- 4. Industry life cycle exhibits the status of industry and gives the clue to entry and exit for investors, elucidate.
- 5. The return on securities A and B are given below:

Probability	У	Security A	PA	(Return	PB	In I	133	
0.50	£	14		12				1
0.40		12		15				a. 61
0.10		ibai 10 m		o fal11	R Indices	Transport	Vhat are the	

Give the security of your preference on the basis of risk and return.

6. Prove that if you invest  $\frac{2}{3}$  of the funds in security A and  $\frac{1}{3}$  in B and the correlation coefficient is  $+\frac{1}{2}$ . Prove that  $I_p^2 = \frac{4I_1^2 + 2I_1I_2 + I_2^2}{I}$ .

### the expected return, Beta and In-NOITSE ances of the securities. What is

Answer any two questions in about 3 pages. Each question carries 15 marks.

(2×15=30)

- Explain in detail Does theory and how it is used to determine the direction of stock market.
- 8. Explain the bond value theories with examples
- 9. The face value of equity shares of ABC Ltd. is Rs.10. The company declared a dividend of 32% for the year 1997-98. The dividends are expected to grow at 21% for the next 5 years and at 10% for the next three years, where after the growth will be 9% perpetually. If the required rate of return is 20%, find the present value of the shares.
- 10. The returns on securities A and B under three scenarios are as under

Is there any advantage in holding a combination of P and Q. and the leaf W

#### SECTION - C

Answer any two questions in about 3 pages. Each question carries 15 marks. (2×15=30)

- Explain in detail the fundamental analysis and how it is useful in selection of securities.
- 8. For the first four years XYZ firm is assumed to grow at the rate of 10%. After 4 years the growth rate is dividend is assumed to decline linearly at 6% for the next 3 years. After 7 years, the firm is assumed to grow at a rate of 6% indefinitely. The next year dividend proposed is Rs. 2 per share and the required rate of return is 14%. Find out the value of the stock.
- 9. Explain in detail the methods of valuation of shares.
- 10. A financial analyst is analysing two investment alternatives Z and Y. The estimated rates of return and their chances of occurrences for the next year are given in the (below) table.

Probability of occurrence	Rates of	Return %
0.20	22	5
0.60	14	15
0.20	-4	25

- a) Determine each alternatives expected rate of return
- b) Is Y comparatively risky?
- c) If the financial manager wishes to invest equal proportion in Y and Z, would it reduce the risk?

#### SECTION - D

Compulsory.

15

11. Stocks A and B have yielded the following returns for the past 2 years

Year	Retu	irns (
	A	В
2009	12	14
2010	16	12

- a) What is the expected return on portfolio with 60% A and 40% B?
- b) Find out the standard deviation.
- c) What is the covariance between A and B?
- d) What is the portfolio risk if the portfolio has 60% A and 40% B?

#### SECTION - C

Answer any two questions in about 3 pages. Each question carries 15 marks.
(2x15=30)

- Explain in detail the fundamental analysis and how it is useful in selection of securities.
- 8. For the first four years XYZ firm is assumed to grow at the rate of 10%. After 4 years the growth rate is dividend is assumed to decline linearly at 6% for the next 3 years. After 7 years, the furn is assumed to grow at a rate of 6% indefinitely. The next year dividend proposed is Rs. 2 per share and the required rate of neurn is 14%. Find out the value of the stock.
  - 9. Explain in detail the methods of valuation of shares.

### II Semester M.F.A. Degree Examination, June/July 2010 (Semester Scheme) FINANCE AND ACCOUNTING

Paper - 2.4: Security Analysis and Portfolio Management

Time: 3 Hours

Max. Marks: 80

#### SECTION - A

Answer any ten questions in about 3-4 lines. Each question carries 2 marks.

 $(2\times10=20)$ 

1., a) What is duration of bonds?

- b) What is a corner portfolio?
- c) What is meant by Financial risk?
- (d) What are negotiable securities? Give three examples.
- e) What are zero coupon bonds?
- f) The Beta of a stock is 3. What is its impact on the stock value?
- g) What is commercial paper?
- (h) What is the impact of co-variances between two securities?
- What are the ways in which a company may raise equity capital?
- j) An investor considers Rs. 1,000 par value bond bearing a coupon rate of 11% with 5 years maturity period. The required ytm is 15%. The bond is currently sold at Rs. 870. Should he buy the bond?
- (k) What are risk free assets? Give examples.
  - 1) What is meant by riding the yield curve?

#### SECTION - B

Answer any three questions in about one page. Each question carries 5 marks.

 $(3 \times 5 = 15)$ 

- Primary and secondary markets are complementary to each other but their organisational setup are different. Explain.
- 3. What is CAPM? What are the underlying assumptions?
  - 4 Explain the theories under term structure of interest.

What are the differences between Markowitz and Sharpe performance indices?

 Assume yourself as a portfolio manager and with the help of the following details find out the securities that are over priced and under priced in terms of SML.

Security	Expected return	β	σ	
A	0.33	1.70	0.50	
В	0.13	1.40	0.35	
С	0.26	1.10	0.40	
D	0.12	0.95	0.24	
Nifty index	0.13	1.00	0.20	
T. bills	0.09	0	. 0	

### SECTION - C

Answer any two questions in about 3 pages. Each question carries 15 marks. (2×15=30)

Explain in detail the fundamental analysis and what is the utility of the study?

8. Given the data for the following two security port folio, find the minimum variance portfolio. Also calculate the return and risk of the portfolio.

Security	Return %	Standard Deviation	Correlation between C & D	
C	26.9	22.30	0.12	
D	17.5	51.00		

Explain the various forms of derivatives and their utility.

(2)10. What is monetary policy? Explain the highlights of annual credit policy announced during April 2010.

SECTION - D

(Compulsory)

 $(1 \times 15 = 15)$ 

11. Stocks L & M have yielded the following returns for the past two years.

Year	Retu	rn %
	L	M
2005	12	14
2006	18	12

- a) What is the expected return on portfolio made up of 60% of L and 40% of M?
- b) Compute the standard deviation of each stock.
- c) What is coefficient of co-relation between L & M.?
- d) What is the portfolio risk with the above proportion?

 Given the data for tite following two security port folio, find the minimum variance: portfolio. Also calculate the roturn and risk of the portfolio.

- 9. I voluin the various forms of derivatives and their utility.
- J.O. What is monetary policy? Explain the highlights of manual credit policy automiced theiring April 2010.

SECTION - D

(Congodwary)

(tals=15)

11. Stocks Like M have yielded the following returns for the past two years.

Instruction : Section D Compulsory.

### SECTION - A-

1. Answer any ten questions in about 3-4 lines. Each question carries 2 marks:

 $(2 \times 10 = 20)$ 

- a) What are open ended Mutual Fund Schemes 2
- b) Mention the advantages of listing of securities.
- c) What is immunisation of a bond ?-
- d) What is the difference between SML and CML?
- e) What are deep discount bonds ?-
- f) What is a certificate of deposit ?
- g) What is meant by intrinsic value ?
- h) What do you mean by efficient fronties?
- i) ABC Co. would pay Rs. 2.50 as dividend per share for the next year and is expected to grow at 12% indefinitely. What would be the equity value if the investor requires 20% return?
- j) What do you mean by breadth of the market ?
- k) What are leveraged portfolios?
- 1) What is sensex ?

P.T.O

Answer any three questions in about one page. Each question carries 5 marks:

2. What are the functions of stock exchanges?

How does systematic risk affects individual stock return?

What are derivative contracts? Explain the differences between options and futures.

- (5) Prem is considering purchase of a bond currently selling at Rs. 878.50. The bond has 4 years to maturity, face value Rs. 1,000 and coupon interest rate of 8%. The required rate of return is 10%.
  - a) Calculate the intrinsic value of the bond. Should Prem purchase the bond? b) Calculate "ytm" of the bond.
- 6. Stocks A and B have the following parameters.

### Stocks

### A

B expected return 20% 30%

Expected variance 16% 25%

Covariance AB 20%

Is there any advantage in holding a combination of securities?

### SECTION - C

Answer any two questions in about 3 pages. Each question carries 15 marks;

Explain in detail Dows theory and how it is used to determine the direction of

### II Semester M.F.A. Degree Examination, June 2008 (Semester Scheme)

### FINANCE AND ACCOUNTING

2.4 : Securities Analysis and Portfolio Management

Time : 3 Hours

### SECTION - A

Max. Marks: 80

- 1. Answer any ten questions in about 3-4 lines. Each question carries 2 marks.
  - 3) What are pre-emptive rights ?
  - b) What are close ended scheme?
  - c) Differentiate between Capital and Money Market Securities.
  - d) What is characteristic regression line?
  - c) What is Security Market Line?
- DWhat is duration of bonds?
- g. Define marked to Market Concept.
- (b) What is Swet equity? Mention the reasons for issuing the same.
- i) What are future contracts?
- Define co-variance between two securities.
- k) What are leveraged portfolios?
- 1) What are risk free assets?

#### SECTION - B

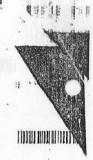

Answer any three questions in about one page each. Each question carries 5 marks.

(3×5=15)

- Explain the differences between systematic risk and unsystematic risk.
- 3. Prove that if you invest 50% of your assets in each of the two securities and if the correlation coefficient is  $+\frac{1}{2}$ , then the portfolio variance is  $\sigma^2 p = \frac{\sigma_1^2 + \sigma_2^2 + \sigma_1 \tilde{\sigma}_2}{4}$
- How does technical analysis differ from fundamental analysis?
- 5. Explain the differences between the holding period return and yield to maturity.
- Explain the weak form of efficient market hypothesis.

P.T.O.

IP ... 735

#### SECTION - C

Answer any two questions in about 3 pages each. Each question carries 15 marks. (2×15=3

- Describe Mean-variance portfolio theory. Explain the statistical methods to obtain the risk reducing benefit.
- 8 Explain the theories covering the term structure of interest rates.
- 9/ Describe single period and multiple period (of) valuation of shares.
- 10. Describe the role of SEBI in regulating capital market.

SECTION - D

#### Compulsory

11. Mr. Ramesh is considering the purchase of three securities A, B and C. The returns on the securities depend on the state of the stock market. The estimated returns are shown in the table.

State of market		Probability of Occurrence	I	Rate of return on security %
	- 1	eginerik - E	I I I A	B. C
Recession		ქ.25	10	9 14
Average		0.50	14	13 12
Boom	and Labore	0.25	16	18 10

- a) Find each stocks expected rate of return and standard deviation and coefficient of variation.
- b) If Ramesh invests  $\frac{1}{3}$  of on each security,
  - 1) What will be the port folio return.
  - 2) Find the variances of securities.
